- **Backend:** Node Js, Express Js, Nest Js, Django

- **Databases and ORM:** MySQL, PostgreSQL, SQLite, MongoDB, Mongoose, TypeORM, Prisma

- **Tools:** Git, Github, Docker, Jira, Github actions

WORK EXPERIENCE

Engineering Lead, Celebration Church International (CCI)   May 2023 – Present

Lagos, Nigeria, (Volunteer)

- Spearheaded technical initiatives and oversaw the development and maintenance of the church's technological infrastructure.

- Designed and built the microservice ecosystem for the backend apis and services in the CCI ecosystem with an asynchronous messaging structure using RabbitMQ.

- Provided technical support to the church staff and volunteers, troubleshooting and resolving technical issues promptly.

- Built and deployed a location based attendance which allowed consenting users check in to services seamlessly once they step into any church premises. This allowed the church to easily track attendance and track growth.

Software Engineer, SourceMyGadgets, Lagos, Nigeria   October 2022 – Present

- Developed and deployed high-quality web applications using frontend and backend technologies.

- Implemented responsive designs, optimized user experiences, and ensured seamless functionality.

- Implemented payment systems using paystack APIs to facilitate ease of payments across products.

- Designed the database structure for their ecommerce sites and backend to optimize data delivery and presentation while reducing complexity.

- Built an automated subscription service for SaveToBuy (a savings platform owned by SourceMyGadgets) to enable users save money automatically on any schedule they want.

Full Stack Developer, Oddience, Lagos, Nigeria   March 2022 – September 2022

- Contributed to the design and development of web applications using frontend and backend technologies.

- Created visually appealing user interfaces and optimized website performance.

- Implemented payment systems using paystack and flutterwave APIs to facilitate collection of payments via the web application.

- Provided customer support to improve customer satisfaction and retention.

- Implemented and deployed a scheduling and calendar service to enable users book events with coaches on the platform.

- Integrated Zoom and Daily SDK to allow in-app conferencing.

Full Stack Developer, Fungry, Lagos, Nigeria   December 2021 – February 2022

- Developed and maintained a meal ticket generating app using Node.js, JavaScript, and React.js.

- Designed and implemented RESTful APIs to integrate with various payment partners and services.

- Developed responsive and user-friendly frontend interfaces using React.js.

- Monitored application performance, identify bottlenecks, and optimize system performance to ensure optimal user experience.

- Integrated a QR code generator and scanner to enable users generate meal tickets on the fly for use at partner restaurants.

Web Developer, Joy Aifuobhokhan, Lagos, Nigeria   January 2021 – March 2021

- Developed and maintained Joy Aifuobhokhan's portfolio website using HTML, CSS and Vanilla Javascript.

- Collaborated with Joy Aifuobhokhan to update and maintain the portfolio website with new projects, achievements, or any changes to the content.

- Continuously optimized the website's SEO (Search Engine Optimization) to improve its visibility and ranking on search engines.

- Provided ongoing technical support and addressed any inquiries or requests related to the portfolio website.
